

## INSECT KILLER

### Attraction:

Specially treated UV-A tube with 365nm wave length for best attraction.  
8000 hours working life on average.

### Killing:

High voltage inner grid for instant killing.

### Cleaning:

Large collection tray for easy cleaning.

### Positioning:

Suspending change provided for ceiling.

SNC series

MODEL NO.	DESCRIPTION	MEASUREMENT	VOLUME
SNC-16	2x8w	33x10x26.3cm	80m <sup>2</sup>
SNC-20	2x10w	38x10x26.3cm	100m <sup>2</sup>
SNC-30	2x15w	48.4x10x31.1cm	150m <sup>2</sup>
SNC-40	2x20w	63.5x10x31.1cm	200m <sup>2</sup>

\*\* Indoor use

- a — **Side Holes** : The UVA lights go through the side holes for larger attraction
- b — **Side Board** : ABS fire-proof material for high safety
- c — **Robust Chain Holder** : For easy suspending. Hidden when not suspended
- d — **Top Cover** : Made from aluminum alloy. Smooth, shining and oil-proof. It's beautiful and easy to clean
- e — **Special UVA tubes** : High quality UV-A light with 365 nm for best attraction to flying insects. Produced by full-automatic production line for high stable quality.
- f — **GS Standard outer Mesh** : Robust for high safety, strict GS standard
- g — **High Voltage Inner Grid** : Strict GS standard for high safety, releases high voltage to kill flying insects with 100% killing rate. High voltage with low current for high safety to human and pets.
- h — **Removable collection trap** : For easy cleaning and convenient use
